

G Suite

A PERFECT COMBINATION

As the world’s leading catalog of ideas, Pinterest is never short on ingenuity. For the wildly popular San Francisco-based web and mobile app, every problem has a solution, and that extends to the company’s set of communication tools. So, when AV Systems Administrator Dom Marsili realized Google Hangouts worked well for internal meetings but little else, he set out to find a tool better suited for hosting meetings with participants outside the company. Reliable audio quality and robust admin controls were a must, as Dom searched for something with a hand-in-glove fit into Pinterest’s Google-based applications suite. He found just what he was looking for in **join.me**.

Dom chose **join.me** as one of Pinterest’s preferred meeting tools because of a winning combination of flexibility, convenience and high performance. It proved easy and intuitive for external meetings for users across the globe, from one-on-one calls with vendors, to small presentations, to calls with a few hundred people.

- **Google Shop Friendly:** The G Suite integration puts **join.me** right at the fingertips of all Pinterest employees. And with the Chrome extension, they can instantly start meetings and share ideas right from their web browser.
- **Masterful User Management:** Dom can easily deploy and manage **join.me** across the company through **join.me**’s Admin Console and OneLogin SSO. He can assign account permissions, call up archived recordings, and provide real-time assistance to all **join.me** users.
- **Superior Call Quality:** Consistently clear audio and easy to access dial-in numbers let to rapid company-wide employee adoption. **join.me** is now “the” tool for all external conference calls.
- **Saving Time Closing Deals:** High-quality, instant screen sharing enables the Pinterest sales team to get the maximum value out of each minute of every call.

With **join.me** Dom has rounded out Pinterest’s web conferencing tools for both internal and external meetings. As Dom says, “*join.me helps to fill a very important role within our web conferencing ecosystem.*” Having rapidly established itself as the preferred audio bridge, Dom says they’ve just scratched the surface of what **join.me** can do for Pinterest’s productivity.

Want to know more about how **join.me** can help you show work who’s boss? **Request a demo** or **call us at 1-877-251-8373.**

G Suite Integration puts join.me at the top of Pinterest wish list
